

PIPE CONDUIT

Product Information

Introducing our versatile Pipe Conduit, now available in a convenient 25m length.

- Crafted to effortlessly navigate obstacles like walls and joints in screed
- Act as insulation/ separation layer from the screed, ensuring consistent heat distribution and preventing floor hot spots where many pipes converge near the manifold for example
- 25mm external and an internal diameter of 21mm, our Pipe Conduit offers ample space for pipe routing without compromising on room
- Flexible but rigid design makes installation and manoeuvring a breeze, seamlessly integrating into your heating or plumbing setup
- Split down its entire length means it can be added to the pipe after initial installation has taken place.
